SUMMARY

Software Engineer with production experience across backend and mobile. Current focus is C#/.NET and Flutter; previously built and operated Django REST and FastAPI services on PostgreSQL, Redis and Elasticsearch with Docker and Kubernetes. I ship mobile apps end to end, App Store and Google Play releases included.

EXPERIENCE

Upwork

Remote

Software Engineer – Freelance

Jul 2026 – Present

- Build, test and ship cross-platform Flutter apps for clients, including technical troubleshooting.
- Run App Store and Google Play submissions end to end, with store listing and ASO optimization.

Fiyator A.Ş. (Ankara, Türkiye) · [fiyator.com](#)

Remote

Software Engineer

Nov 2025 – Feb 2026

- Independently built **BidsForShips**, a multi-tenant B2B maritime tender platform for 3,000+ companies.
- Django REST backend on PostgreSQL, Redis, Celery and Elasticsearch, with tenant-aware RBAC.
- Integrated Param and PayTR payments with transaction validation and callback handling.
- Deployed and ran production on Kubernetes with Docker, Hetzner, Cloudflare and CI/CD.
- Operated a self-hosted Postfix + Dovecot mail server with SPF, DKIM and DMARC.

Software Engineer – Freelance

Aug 2025 – Oct 2025

- Extended Django REST and FastAPI services on PostgreSQL and Redis, shipping API improvements and fixes.

Software Engineer Intern

Jun 2025 – Aug 2025

- Worked on backend systems with 14M+ product records, 12M+ images and 529K+ categories.
- Reduced average API response from ~450ms to ~200ms with PostgreSQL indexing, Redis and Elasticsearch.
- Built a Django REST + FastAPI category matching service with 95% accuracy using Semantic Transformers.
- Designed FAISS vector search with Redis caching and a FastAPI service running Ollama (gemma3n:e2b).
- Worked on the Flutter redesign, documented 45+ functional and UI issues in the app.
- Found and fixed a subscription validation bug that let expired premium users keep access.

PROJECTS

• Zerbook

Present

Gold portfolio tracking app in Flutter; I build the ASP.NET Core backend and manage store releases.

Flutter · ASP.NET Core · EF Core · JWT · SignalR · PostgreSQL · Background Workers · Docker · Kubernetes

• Entegram · App Store / Play Store

English learning app built around short, swipe-based lessons; published on iOS and Android.

Flutter · ASP.NET Core · SignalR · Firebase · Subscriptions · Deep Links · Background Processing

• Mail Sender Smart Edition · [mailsendersmartedition.com](#)

AI-assisted bulk email platform running on a self-hosted mail server.

Flutter · Django · Celery · Redis · Gemini · Postfix + Dovecot · SPF/DKIM/DMARC · Docker · Kubernetes

• CompAtlas · [compatlas.com.tr](#)

Present

Solo-built data platform: 17K+ tech companies in 81 provinces, with normalization, dedup and geospatial processing.
